

Subject Index to Volume 25

A

- Acetylcholine
anti-EDRF effects of tumor necrosis factor and, carotid arteries, H1509
dilation from, cerebral arterioles, arachidonate effects, H665
EDRF release and
coronary artery, H828
hypoxia effects, H1595
endothelium-associated, microcirculatory vasodilation and, skeletal muscle, H720
heart rate dependence, model, H520
intracellular sodium activity and, cardiac Purkinje fibers (sheep), H1407
parasympathetic denervation, infarction, left ventricle, H859
release, muscarinic autoreceptors and, heart, H1073
repetitive activity and, atrial fibers, H74
vagus nerve stimulation, heart rate and ventricular contractility (chicken), H1295
vasomotor responses and, arterioles (hamster), H832
vitamin E deficiency effects, vascular function, H1539
- Acidosis
recovery from, sodium-hydrogen exchange in, myocardium, H256
systemic, brain pH responses to sodium bicarbonate and Bicarb, H1316
- Actin, pulmonary edema and (guinea pig), H1012
- Adenosine
coronary flow reserve, low perfusion pressure and, H1176
formation, propranolol prevention of, myocardium (guinea pig), H772
preservation of coronary flow reserve, stunned myocardium, H1303
receptors: *see* Receptors
SA nodal bradycardia induced by, receptor mediation of, H1553
uptake, pial arterioles, H603
vascular adaptation and, embryo (chick), H240
- Adenosine analogue, heart rate and, H1553
- Adenosine diphosphate, endothelium-dependent dilatation of cerebral arterioles, diabetes mellitus effects, H621
- Adenosine monophosphate, cyclic
lidocaine effects, cardiomyocytes, H422
renal arteriolar, dopamine stimulation of, H626
- Adenosine triphosphatase, myosin isoenzymes and, after infarction, H745
- Adenosine triphosphate
ischemic heart, NMR assessment, H195
relation to oxygen consumption, heart, H265
- Adenosine triphosphate precursors, effects on ATP and free ADP content, postischemic heart, H560
- Adenylate cyclase
 β -adrenoceptors, heart valve leaflets, H821
- β -receptor coupling, hypoxic ventricular myocytes, neonate, H1209
- ADP: *see* Adenosine diphosphate
- Adrenal gland
blood flow: *see* Blood flow
insufficiency, cardiovascular system and, H1274
- Adrenal medulla, vasculature, adrenergic receptors and, H233
- Afferents
renal, renal artery occlusion and, H1515
vagal, myocardial ischemia effects on baroreflex, H672
visceral, chemical stimulation, coronary vascular responses, H735
- Afterload, left ventricular, vagal stimulation and, H428
- Aging
alterations in blood flow and reserve, coronary, H66
impairment of central and baroreceptors, female, H1399
myocardial structure and function and, H1440
- Alkalinization, intracellular, arterial smooth muscle, H867
- Allopurinol, dose-related protection, reperfusion arrhythmias, H1344
- Alloxan, diabetes, measurement of intracellular oxygen tension, H1127
- Amiloride, sodium-hydrogen exchange and, myocardium, H256
- Ammonium chloride, intracellular alkalization, arterial smooth muscle, H867
- Anemia, optimal hematocrit, gastric, H472
- ANF: *see* Atrial natriuretic factor
- Angiogenesis, structural vascular adaptation, embryo (chick), H240
- Angiotensin
subpressor, sodium chloride infusion and, synergism, H1
vasomotor activity, coronary collateral circulation, H890
- Angiotensin II
receptors, enalapril effects, subfornical organ in spontaneous hypertension, H1609
vasoconstriction and endothelial damage, stenotic arteries, H881
vitamin E deficiency effects, vascular function, H1539
- Angiotensin-converting enzyme inhibitors, angiotensin II receptors and, subfornical organ in spontaneous hypertension, H1609
- Anions, efflux, cellular, myocardial ischemia, H1165
- ANP: *see* Atrial natriuretic peptide
- Antidiuretic hormone: *see also* Vasopressin
 V_2 agonists, vasodilatation, H1621
- Anti-free radical agents, dose-related protection, reperfusion arrhythmias, H1344
- Antioxidants, myocardial, erythrocytes and, H584
- ANTU: *see* α -Naphthylthiourea
- Aorta, pulse-synchronized contractions, Windkessel model, H928
- Aortic nerve, afferent, aging and, female, H1399
- Aortic valve, autoradiographic characterization, heart valve leaflets, H821
- Aortic wall, distensibility, diltiazem effects, H1580
- Apotransferrin, postischemic microvascular injury and, skeletal muscle, H1472
- Aqueous humor, oxygen tension, fiber-optic sensor measurement of, H1127
- Arachidonate
inhibition of dilation, cerebral arterioles, H665
prostaglandin E_2 , arterial baroreflexes, awake state, H999
- Arrhythmias
hyperkalemia, monophasic action potential recordings, H956
reperfusion, protection by anti-free radical interventions, H1344
reperfusion-induced, heart rate and, H21
respiratory sinus, transfer function analysis, H153
tissue geometry effects, cardiac action potential, H391
ventricular, volume load, H1697
- Arterial system
effective length, pulse reflection sites and, H1684
simulated, impedance, H1087
- Arterioles
cerebral
dilation from acetylcholine, arachidonate effects, H665
endothelium-dependent dilatation during diabetes, H621
lipoxin effects on dilation, newborn (pig), H468
response to hypocapnic hypoxia, H460
mechanics and composition, brain stem and cerebrum, H493
myogenic response, rate-sensitive component, wing (bat), H32
pial, vasodilation, inosine effects, H603
renal, cAMP production, dopamine stimulation of, H626
single, vascular smooth muscle, length-tension relations (hamster), H630
vasomotor responses in
cell-to-cell communication (hamster), H838
propagation in (hamster), H832
- Artery: *see also* specific artery
tail, smooth muscle cells, calcium channels in, H1361
- ATP: *see* Adenosine triphosphate
- ATPase: *see* Adenosine triphosphatase;
Sodium-potassium-ATPase
- Atrial natriuretic factor
release
alveolar hypoxia effects, awake state (lamb), H990
manipulations of calcium environment and, H1588
volume expansion and, H852
- Atrial natriuretic peptide
attenuated response, myocardial infarction, H533

- Atrial natriuretic peptide (*continued*)
 mechanism, decrease in cardiac output, H760
 natriuretic effects of, vasopressin effects, H925
 neurohumoral changes and, onset and offset of heart failure (ewe), H1052
 receptors: *see* Receptors
 synthetic, renal hypertension and, H1393
- Atropine
 plasma, arterial wall function and, awake state, H713
 release, pericardial pressure and, H648
- Atrioventricular block, cardiac output and arterial pressure, awake state, H361
- Atrioventricular node, hypoxia effects, adult and neonate, H1337
- Atrium: *see* Heart atria
- Atropine, acetylcholine effects and, sodium activity in Purkinje fibers (sheep), H1407
- Autonomic nervous system
 response to neural antagonists, pentobarbital modification of, H1384
 vagal stimulation, left ventricular relaxation and, H428
 vagus nerve stimulation, heart rate and ventricular contractility (chicken), H1295
- Autoregulation
 calcium-dependent, hypertrophied heart, H1139
 capacity, saphenous vein, H47
 long-term, coarctation hypertension and, H213
 whole body, during hypoxia and hyperoxia, awake state, H1023
- Awake state
 ANF release, alveolar hypoxia effects (lamb), H990
 arterial wall stress, during volume loading, H713
 blood pressure, central effects of endothelin, H1747
 cardiac output and blood flow, enkephalin effects, H1651
 collateral blood flow change, after coronary occlusion, H478
 contractile function, heterogeneously perfused myocardium, H352
 endothelin hemodynamic effects, H1742
 hyperoxia and hypoxia, whole body autoregulation during, H1023
 occlusion and reperfusion, coronary artery, H1719
 pulmonary vascular response to neural antagonists, pentobarbital modification of, H1384
 single-beat evaluation of contractility, left ventricle, H56
 single diastole, hyperemic response to coronary occlusion, H1645
 vasopressin effects, cardiovascular reflexes (baboon), H1546

B

- BAY K 8644
 calcium channels, tail artery smooth muscle cells, H1361
 regional response to, hindquarter vascular bed, H598
- Benzyl alcohol, sarcolemmal fluidity and, cardiomyocytes, H422

- Bifurcation, leukocyte shunting, muscle, H85
- Bleeding time, hemostatic plug formation, trigramin inhibition of, H1038
- Blockade
 α -adrenergic, during exercise, H1148
 β -adrenergic, baroreflex blunting in obesity, H417
- Blood
 constituents: *see* specific constituent
 viscosity, microvascular pressure in lung and, H766
- Blood-brain barrier, transport, indicator diffusion technique, H794
- Blood flow: *see also* Circulation;
 Microcirculation
 acute hypoxemia, fetal response (sheep), H613
 adrenal, during hypoxia, H94
 adrenal cortical and medullary, adrenergic receptors and, H233
 autoregulation of, rate-sensitivity of myogenic response, wing (bat), H32
 carotid, reduced, arterial adaptation, H931
- cerebral
 during hypoglycemia, newborn, H1659
 during seizures, prostanoid role in (piglet), H120
 evoked potentials and, during Cushing response (sheep), H779
 hypocapnic hypoxia, H460
 hypoglycemia effects, H697
 laser-Doppler assessment, H1247, H1255
 collateral, progressive change, after coronary occlusion, awake state, H478
- coronary
 adenosine analogue effects, H1553
 α_1 -adrenergic control, H334
 myocardial respiration and, H265
 regulation, single diastole, awake state, H1645
 reserve and, alterations with aging, H66
 sleep effects, H1378
 distribution, ANP mechanism for decrease in cardiac output, H760
 enkephalin effects, awake state, H1651
 estimation, model for, rubidium kinetics and, myocardium, H1156
 local control, propagation of vasomotor responses (hamster), H832, H838
 microvascular rarefaction, hypertension and (hamster), H126
 myocardial, flow distribution during vasodilation (guinea pig), H297
- regional
 dextran, blood viscosity, and, H898
 vasopressin analogue and, H1621
 umbilical, ethanol and oxygen diffusion and (sheep), H813
 uterine, ethanol and oxygen diffusion and (sheep), H813
- Blood pressure: *see also* Pressure
 acute hypoxemia, fetal response (sheep), H613
 age-related baroreceptor impairment, female, H1399
 ANP response, H533
 arousal response to hypotension, sinoaortic denervation effects (lamb), H434
- arterial
 during Cushing response (sheep), H779
 fluctuations, model, H1573
 baroreflex blunting, obesity, H417
 changes, narcolepsy-cataplexy, H111
 coronary, sleep effects, H1378
 elevation, sodium-angiotensin synergism, H1
 endothelin effects, awake state, H1742, H1747
 fastigial nucleus, ventrolateral medullary lesions and, H1200
 occlusion and reperfusion, coronary artery, H1719
 regulation
 low-salt diet and, H446
 phasic baroreceptor discharge and, H1735
 renal sympathetic outflow, activation by intracisternal hypertonic sodium chloride, H411
 salt deprivation effects, H1426
 vasopressin regulation, dehydration (baboon), H486
 volume expansion, ANF and, H852
- Blood volume: *see also* Volume
 ANF release and, awake state (lamb), H990
 renovascular hypertension, H502
 venous outflow and sympathetic nerve activity and, hypoxic change, H162
- Bone, ^{99m}Tc -MDP uptake, multiple tracer studies, H1261
- Bradycardia
 reflex, CRF modulation of, H949
 SA nodal, adenosine-induced, receptor mediation of, H1553
- Bradykinin
 cerebral microcirculation, laser-Doppler assessment, H1255
 release, aortic endothelial cells, H1030
 stimulation, abdominal visceral organs, coronary vascular responses, H735
- Brain
 blood flow: *see* Blood flow, cerebral
 endothelium-dependent dilatation, diabetes mellitus effects, H621
 ischemic injury, free radical scavengers in, H589
 metabolism, hypoglycemia effects, H697
 microvascular and blood flow responses, hypocapnic hypoxia, H460
 oxygenation, noninvasive determination, spectroscopy, H1493
 pH responses, sodium bicarbonate and Carbicarb during systemic acidosis, H1316
 transport kinetics, indicator diffusion technique, H794
- Brain stem
 arteriole mechanics and composition, H493
 auditory-evoked response, cerebral blood flow and evoked potentials in (sheep), H779
- Breathing: *see* Respiration

C

- Cachectin, anti-EDRF effects of tumor necrosis factor and, carotid arteries, H1509
- Caffeine
 calcium regulation, hypertrophied ventricle, H1006
 excitation-contraction coupling, sarcolemmal reticulum participation in, ventricle (frog), H1432

- slowly relaxing response, heart ventricles, H1100
- Calcium
 - environment, ANF release and, H1588
 - extracellular
 - autoregulation, hypertrophied heart, H1139
 - potassium-induced artery relaxation in hypertension, H707
 - flux, basal energy requirements, heart, H846
 - intracellular alkalinization, arterial smooth muscle, H867
 - intracellular loading, cardiac myocytes, X-ray microanalysis, H574
 - release, slowly relaxing caffeine responses, heart ventricle, H1100
 - sensitivity
 - fibers of hypertrophied ventricle, H1006
 - ontogeny of, cardiac, H179
- Calcium channels
 - caffeine effects, cardiac sarcoplasmic reticulum, H328
 - selectivity, cardiac contraction by photorelease of calcium (frog), H916
 - smooth muscle cells, tail artery, H1361
- Calcium currents
 - L- and T-type
 - cardiac Purkinje cells, H1478
 - ventricle cells (chick), H1505
 - low-threshold, ventricle cells (chick), H1505
- Calcium ions
 - ATP-dependent accumulation, depression by oxygen free radicals, H368
 - photorelease, ventricular myocardium (frog), H916
- cAMP: *See* Adenosine monophosphate, cyclic
- Capacitance
 - vascular
 - hypoxic change, H162
 - reversal of hypertension and, H502
- Capillaries
 - cerebral, response to hypocapnic hypoxia, H460
 - filtration coefficient, protein concentration, hindlimb, H186
 - plugging, leukocyte, microcirculation in lungs and, H1117
 - tortuosity, endurance training effects, soleus muscle, H1110
- Capsaicin, stimulation, abdominal visceral organs, coronary vascular responses, H735
- Carbachol, downregulation and desensitization, heart (chicken), H321
- Carbicarb, sodium bicarbonate and, brain pH responses, during systemic acidosis, H1316
- Carbon dioxide, responsiveness, hypoglycemia effects, H697
- Carbon monoxide
 - hypoxia, regional adrenal blood flow during, H94
 - cardiac, magnesium and reperfusion of, H195
- Cardiac output
 - acute hypoxemia, fetal response (sheep), H613
 - arterial pressure and, effects of steps, AV block, awake state, H361
 - decrease, ANP and, H760
 - during Cushing response (sheep), H779
 - during hypoxia and hyperoxia, awake state, H1023
 - endothelin effects, awake state, H1742
 - enkephalin effects, awake state, H1651
 - factors influencing changes, pregnancy, H1060
 - hemoglobin concentration effects (lamb), H527
 - low, prostaglandin and neurohumoral factors in, H1079
 - microsphere determination of, fetus (sheep), H302
 - performance after monocrotaline-induced pulmonary hypertension, H1328
 - peripheral vasodilatation, vasopressin analogue-induced, H1621
 - synthetic ANP infusion effects, renal hypertension and, H1393
- Cardiomyocytes, sarcolemmal fluidity and cellular cAMP in, lidocaine effects, H422
- Cardionatriin, calcium release and, H1588
- Carotid artery
 - adaptations, reduced blood flow, H931
 - occlusion, myocardial ischemia effects, H672
 - tumor necrosis factor, anti-EDRF effect of, H1509
 - vascular responsiveness, pregnancy and (sheep), H1282
- Carotid sinus, baroreflex, phasic baroreceptor discharge and, H1735
- Catalase
 - defense mechanisms, postischemic skeletal muscle, H789
 - ischemic brain injury and, H589
 - postischemic response to, diabetes effects, H1353
- Cataplexy, narcolepsy and, cardiovascular variables during, H111
- Catecholamines
 - adrenal medullary vasculature and, H233
 - central pressor effects, blood pressure, awake state, H1747
 - regional adrenal blood flow, during hypoxia, H94
 - renal sympathetic outflow, activation by intracisternal hypertonic sodium chloride, H411
- Caudal ventrolateral medulla, DL-homocysteic acid effects, H688
- Celiac ganglion, stimulation, reflex control, H1066
- Cell-to-cell interaction, myocardial infarction, H1266
- Central nervous system
 - endothelin effects, blood pressure, awake state, H1747
 - peptides, cardiovascular responses to stress and, H1369
 - renal sympathetic outflow, activation by intracisternal hypertonic sodium chloride, H411
 - venous outflow, hypoxic change, H162
- Cerebellum
 - fastigial nucleus, ventrolateral medullary lesions and, H1200
 - nodulus-uvula depressor response, H1601
- Cerebrum, arteriole mechanics and composition, H493
- cGMP: *see* Guanosine monophosphate, cyclic
- Chemiluminescence, nitric oxide as EDRF, aortic endothelial cells, H1030
- Chemoattractants, leukocyte adherence induced by, dimethylsulfoxide prevention of, H594
- Chloride, loading, salt deprivation effects on blood pressure, H1426
- 2-Chloroadenosine, cerebral microcirculation, laser-Doppler assessment, H1255
- Circulation: *see also* Blood flow; Microcirculation
 - cerebral
 - inosine effects on pial arterioles, H603
 - lipoxin effects, newborn (pig), H468
 - coronary
 - adenine nucleotide catabolism in, H1565
 - arterial flow-venous pressure relations in, H906
 - oxygen flux density, capillaries, H375
 - pressure-flow characteristics, H441
 - coronary collateral, vasomotor activity of, H890
 - gastric and intestinal, hemodilution effects, H171
 - microspheres determination, cardiac output, fetus, model (sheep), H302
 - PAF-acether and, newborn (piglet), H205
 - peripheral, ANP mechanism for decrease in cardiac output, H760
 - renal, dopamine effects on renal arterioles, H626
 - right coronary, low perfusion pressure and, H1176
- CNS: *see* Central nervous system
- Collagen
 - arterial adaptation, reduced blood flow, H931
 - dermal imbibition pressure, acute burn edema, H940
 - von Willebrand multimer accumulation and, endothelial cells, H1635
- Compliance
 - arterial, ANP mechanism for decrease in cardiac output, H760
 - vascular, renovascular hypertension, H502
- Converting enzyme, inhibition, salt deprivation effects on blood pressure, H1426
- Coronary artery
 - endothelium-dependent relaxations, dietary fatty acids and (pig), H968
 - left circumflex, heterogeneity and basal EDRF, H828
 - ligation, myosin isoenzymes and ATPase activity after infarction, H745
 - occluder, long-term collateralization studies, H1707
 - occlusion: *see* Coronary occlusion
 - proximal and distal, EDRF effects, H828
 - stenosis
 - repeated exercise, H1462
 - vasoconstriction and endothelial damage, H881
 - vasoconstrictor site, medullary reticular formation, H1218
- Coronary collaterals
 - long-term studies, automatic syringe, H1707
 - pressure-flow characteristics, H441
- Coronary flow
 - after α -adrenergic blockade, exercise effects, H1148
 - persistent reserve, low perfusion pressure, H1176

Coronary flow (*continued*)

- reserve, preservation of, stunned myocardium, H1303
- Coronary occlusion
 - automatic syringe for, long-term collateralization studies, H1707
 - collateral blood flow change after, awake state, H478
 - creatine kinase isoenzyme response to, myocardial, H508
 - hyperemic response to, during single diastole, awake state, H1645
 - myocardial ischemia effects, H672
 - reperfusion and, technique for, awake state, H1719
- Coronary reserve, blood flow and, alterations with aging, H66
- Coronary sinus, occlusion, intermittent, flow-venous pressure relations, H906
- Corticosteroids, regional adrenal blood flow, during hypoxia, H94
- Corticosterone, replacement, adrenalectomy and, vascular responsiveness, H1274
- Corticotropin-releasing factor
 - baroreflex function and, acute burn edema, H940
 - central autonomic modulation by, cardiac baroreflex, H949
- Coupling
 - cell-to-cell, arterioles (hamster), H838
 - excitation-contraction
 - caffeine and, cardiac sarcoplasmic reticulum, H328
 - caffeine responses, H1100
 - cardiac myocytes, X-ray microanalysis, H574
 - oxygen consumption and, heart, H1289
 - photorelease of calcium, ventricular myocardium (frog), H916
 - sarcoplasmic reticulum participation in, ventricle (frog), H1432
 - β -receptor-adenylate cyclase, hypoxic ventricular myocytes, neonate, H1209
 - stimulus-secretion, manipulations of calcium environment and, H1588
- Creatine kinase, myocardial, response to coronary artery occlusion, H508
- Creatine phosphate, ischemic heart, NMR assessment, H195
- CRF: *see* Corticotropin-releasing factor
- Cryosupernatant, von Willebrand multimer accumulation and, endothelial cells, H1635
- Currents: *see* specific type
- Cushing response, evoked potentials, cerebral blood flow and (sheep), H779
- Cycloheximide, anti-EDRF effects of tumor necrosis factor and, carotid arteries, H1509
- Cyclohexyladenosine, SA nodal bradycardia induced by, receptor mediation of, H1553
- Cyclopentyladenosine, SA nodal bradycardia induced by, receptor mediation of, H1553
- Cytoplasts, neutrophils and, lung injury induced by, H751
- Cytoskeleton, cardiac myocytes, stiffness and shortening changes, H533

D

- Deferoxamine
 - postischemic microvascular injury and, skeletal muscle, H1472
 - vasodilator response to acetylcholine and, cerebral arterioles, H665
- Dehydration, blood pressure, vasopressin regulation of (baboon), H486
- Denaturation, thermal, tissue pressures in burns, H940
- Deoxycorticosterone acetate, hypertension, pressor responses to vasopressin (pig, sheep), H101
- Deoxyribonucleic acid, arterial adaptation, reduced blood flow, H931
- Development: *see also* Growth
 - calcium sensitivity, cardiac, H179
 - cardiac, fatty acid metabolism and, neonate (piglet), H9
 - vascular, adenosine role in, embryo (chick), H240
- Dextran, blood viscosity and, regional hemodynamics, H898
- Diabetes
 - intraocular oxygen tension, fiber-optic sensor measurement of, H1127
 - postischemic response to prostacyclin and, H1353
- Diabetes mellitus
 - endothelium-dependent dilatation during, cerebral arterioles, H621
 - norepinephrine, vascular sensitivity to, H1134
- Diastole
 - single, hyperemic response to coronary occlusion, awake state, H1645
 - ventricular distensibility, hypoxia-induced, ouabain effects, H681
- Diastolic interaction gain, ventricular, measured with hemodynamic transients, H567
- Diltiazem
 - acetylcholine and epinephrine interactions, repetitive activity in atrial fibers, H74
 - aortic pressure-diameter relations and, H1580
 - postischemic response to, diabetes effects, H1353
- Dimethylsulfoxide, leukocyte adherence and, chemoattractant-induced, H594
- Dipyridamole
 - coronary microvascular resistance produced by, redistribution, H383
 - vasodilation, perfusate flow during, heart (guinea pig), H297
- Dithiothreitol, hypoxia effects, H1595
- Diuresis, ANP infusion, heart failure, H533
- DOCA: *see* Deoxycorticosterone acetate
- Docosahexaenoic acid, dietary, endothelium-dependent relaxations and, coronary artery (pig), H968
- Dopamine, cAMP production and, renal arterioles, H626

E

- Echocardiography, cardiac output, pregnancy, H1060
- Ectonucleotidases, catabolism, coronary circulation, H1565

Edema

- acute burn, dermal imbibition pressure in, H940
- pulmonary
 - arginine vasopressin and, infant (lamb), H641
 - erythrocytes and liquid filtration, H515
 - protein kinase inhibitor and (guinea pig), H1012
 - vascular permeability and resistance in, H1711
- EDRF: *see* Endothelium-derived relaxing factor
- Eicosapentaenoic acid, dietary, endothelium-dependent relaxations and, coronary artery (pig), H968
- Elastin, arterial adaptation, reduced blood flow, H931
- Electrical activities, PAF release, ischemic-reperfused heart, H1236
- Electromyocardiogram, occlusion and reperfusion, coronary artery, H1719
- Electrophysiology, cardiac, hypoxia effects on atrioventricular node, adult and neonate, H1337
- Embolization, coronary collaterals, pressure-flow characteristics, H441
- Embryo
 - heart
 - downregulation of adenosine receptors (chicken), H321
 - low-threshold calcium current (chick), H1505
 - vascular adaptation and, adenosine role in (chick), H240
- Endothelial cells
 - aortic, release of nitric oxide and endothelium-derived relaxing factor, H1030
 - hydraulic conductivity, endothelial monolayers, H1675
 - monolayers, hydraulic conductivity, H1675
 - von Willebrand multimer accumulation, cryosupernatant and, H1635
- Endothelin
 - central effects, blood pressure, awake state, H1747
 - hemodynamic effects, awake state, H1742
 - regional response to, hindquarter vascular bed, H598
- Endothelium, carotid artery, anti-EDRF effects of tumor necrosis factor, H1509
- Endothelium-dependent relaxation
 - dietary fatty acids and, coronary artery (pig), H968
 - femoral artery, heart failure effects, H962
- Endothelium-derived relaxing factor
 - basal, heterogeneity and, coronary arteries, H828
 - release
 - aortic endothelial cells, H1030
 - hypoxia stimulation of, H1595
 - tumor necrosis factor effects, carotid arteries, H1509
 - vasoconstriction and endothelial damage, stenotic arteries, H881
- Energy, basal metabolic requirements, heart, H846

Enkephalin, cardiac output and blood flow, awake state, H1651
 Enzymes: *see also* specific enzyme
 myocardial, coronary artery occlusion, H508
 Epinephrine
 acetylcholine interactions, repetitive activity in atrial fibers, H74
 oxygen consumption and, myocardial respiration, H265
 plasminogen activator release and, hindlegs, H404
 Erythrocytes
 hydrogen peroxide levels and, myocardial injury, H584
 liquid filtration and, injured lungs, H515
 microcirculation, oxygen exchange, muscle (hamster), H247
 transit, brain, indicator diffusion technique, H794
 Ethanol, transplacental diffusion, umbilical blood flow effects (sheep), H813
 Exercise
 cardiac autonomic activity before and after, modulation of, H132
 coronary flow during, after α -adrenergic blockade, H1148
 hyperkalemia, monophasic action potential recordings, H956
 ischemia induced by, cumulative deterioration of myocardial function, H1462
 sympathetic activity, muscle ischemia and, H105
 training, capillary tortuosity in soleus muscle, H1110

F

Fastigial nucleus, cardiovascular response, ventrolateral medullary lesions and, H1200
 Fatty acids
 dietary, endothelium-dependent relaxations and, coronary artery (pig), H968
 metabolism, ventricular function and, neonate (piglet), H9
 myocardial ischemic injury and, H1192
 unesterified
 Feedback
 contraction-excitation, volume load, heart, H1697
 papillary isotonic, adaptive approach (ferret, rabbit), H1726
 Feeding (diet, low-salt, aberrant baroreceptor mechanotransduction, H446
 Femoral artery
 endothelium-dependent responses, heart failure effects, H962
 vitamin E deficiency effects, vascular function, H1539
 Fetus: *see also* Pregnancy
 cardiac output, microsphere determination (sheep), H302
 lymph flow, thoracic duct (sheep), H16
 response, acute hypoxemia (sheep), H613
 umbilical blood flow, transplacental diffusion of ethanol and oxygen (sheep), H813
 Fibrin, degradation, lung, γ -thrombin and (sheep), H1690

Flow
 coronary, hydrodynamic force effects, H1532
 pulmonary venous, diastolic interaction gain, H567
 Flowmetry, laser-Doppler, cerebral microcirculation, H1247, H1255
 Fluid, dynamics, thoracic duct, fetus (sheep), H16
 Forskolin
 β -adrenoceptors, heart valve leaflets, H821
 dopamine-stimulated cAMP production and, renal arterioles, H626

G

Gallbladder, chemical stimulation, coronary vascular responses, H735
 Gas, exchange, peripheral, capillary tortuosity in soleus muscle, H1110
 Geometry, tissue, initiation of cardiac action potential, H391
 Glucose, utilization, during hypoglycemia, newborn, H1659
 Glutathione, defense mechanisms, postischemic skeletal muscle, H789
 Glycolysis, cardiac metabolism, impaired, potassium loss during, H1165
 Glycosides, digitalis, myocardial function during hypoxia, H681
 Gracilis muscle, postischemic microvascular injury, hypoxic reperfusion and, H315
 Gravitation, chronic tilt, saphenous vein and, H1185
 Growth: *see also* Development
 arterial, adaptation to reduced blood flow, H931
 Guanosine monophosphate, cyclic, endothelium-associated, microcirculatory vasodilation and, skeletal muscle, H720

H

Heart: *see also* Muscle, heart; Myocardium
 acetylcholine release, muscarinic autoreceptor effects, H1073
 action potential, tissue geometry effects, H391
 α_1 -adrenergic control, coronary flow, H334
 ANF release, manipulations of calcium environment and, H1588
 atrioventricular node, hypoxia effects, adult and neonate, H1337
 autonomic activity, during and after exercise, H132
 baroreflex, central autonomic modulation by CRF, H949
 contraction, photorelease of calcium ions (frog), H916
 development, ontogeny of calcium sensitivity, H179
 downregulation, adenosine receptors (chicken), H321
 embryonic, low-threshold calcium current (chick), H1505
 failure
 ANP response, H533
 endothelium-dependent responses in femoral artery, H962
 neurohumoral changes during (ewe), H1052

fatty acid metabolism, ventricular function and, neonate (piglet), H9
 hypertrophy
 arterial vasodilators and volume load, H876
 calcium-dependent autoregulation in, H1139
 left ventricular function and, H974
 myosin isoenzymes and ATPase activity after infarction, H745
 outward currents in, H1450
 hypoperfusion, adenosine formation, propranolol prevention of (guinea pig), H772
 ischemic
 chronic whole-body sympathectomy effects, H1322
 magnesium and reperfusion of, H195
 ischemic-reperfused, PAF release from, H1236
 myosin isoenzymes, ATPase activity and, after infarction, H745
 performance, aging effects, H1440
 phosphate metabolites, relation to oxygen consumption, H265
 polarized and depolarized arrest, basal metabolism in, H846
 postischemic, ATP precursor effects, H560
 purine and prostacyclin production, hydrodynamic force effects, H1532
 Purkinje cells, L- and T-type calcium currents in, H1478
 reperfusion arrhythmias, anti-free radical agents and, H1344
 sarcolemma
 calcium pump activity, depression by oxygen free radicals, H368
 lidocaine effects on fluidity, cardiomyocytes, H422
 sodium-calcium exchange, ischemia effects, neonate, H1615
 sarcoplasmic reticulum, calcium release channel, caffeine effects, H328
 transplant, power spectrum in exercise, H132
 vasodilation in, perfusate flow during (guinea pig), H297
 volume load, electrophysiological effect of, H1697
 working, performance after pulmonary hypertension, H1328
 Heart atria
 fibers, repetitive activity, role of acetylcholine in, H74
 left junctions, alterations with aging, microspheres, H66
 rate response, transfer function analysis, H142
 transient calcium current, norepinephrine effects, H1500
 Heart cells: *see also* Myocardial cells; Myocytes
 hypoxia, β -adrenergic receptor regulation during (chick), H275
 mediated by α_1 -adrenoceptors, norepinephrine effects, H1500
 ventricular, low-threshold calcium current (chick), H1505
 Heart rate
 acute stress effects, central oxytocin system mediation of, H1369
 adenosine analogue effects, H1553

Heart rate (*continued*)

- age-related baroreceptor impairment, female, H1399
- arrhythmias, ischemia-induced and reperfusion-induced, H21
- arterial pressure and, low-frequency oscillations in, models, H1573
- autonomic regulation, transfer function analysis, H153
- baroreflex blunting, obesity, H417
- changes, narcolepsy-cataplexy, H111
- dependence on acetylcholine, model, H520
- fastigial nucleus, ventrolateral medullary lesions and, H1200
- DL-homocysteic acid effects, caudal ventrolateral medulla, H688
- occlusion and reperfusion, coronary artery, H1719
- power spectrum, exercise, H132
- prostaglandin effects, arterial baroreflexes, awake state, H999
- renal sympathetic outflow, activation by intracisternal hypertonic sodium chloride, H411
- sleep stage differential effects, H1378
- vagus nerve effects (chicken), H1295
- variability, computer model, H1573
- Heart valve, leaflets, β -adrenoceptors in, H821
- Heart ventricles
 - blood flow and reserve, alterations with aging, H66
 - contractility, vagus nerve effects (chicken), H1295
 - fibrillation threshold, volume load, H1697
 - function
 - during hypoxia, ouabain effects, H681
 - fatty acid metabolism and, neonate (piglet), H9
 - repeated exercise, H1462
 - hypertrophy
 - arterial vasodilators and, H876
 - fibers, sarcoplasmic reticulum function in, H1006
 - performance, aging effects, H1440
 - postischemic dysfunction, neutrophil depletion, H341
 - sarcoplasmic reticulum, participation in excitation-contraction coupling (frog), H1432
 - slowly relaxing responses, caffeine, H1100
- Heart ventricles, left
 - epicardial parasympathetic denervation, subendocardial infarction and, H859
 - function, experimental volume overload hypertrophy, H974
 - inotropic state, single-beat evaluation, awake state, H56
 - pressure: *see* Pressure
 - relaxation, vagal stimulation effects, H428
- Heart ventricles, right, performance, after monocrotaline-induced pulmonary hypertension, H1328
- Hematocrit
 - capillary, oxygen exchange in myocardium, H375
 - microvascular pressure and, lung, H766
 - optimal, gastric oxygenation, H472
- Hematoporphyrin, photoradiation, vascular smooth muscle, H655

- Hemodilution, oxygenation and, gastric and intestinal, H171
- Hemoglobin
 - concentration, cardiac output and oxygen transport (lamb), H527
 - EDRF release, hypoxia effects, H1595
 - saturation, noninvasive determination, spectroscopy, H1493
- Hemorrhage, pressoregulatory mechanisms after, H291
- Hemostasis, inhibition by trigramin, H1038
- Histamine
 - adrenergic control, intrarenal arteries, H607
 - pertussis toxin and, perivascular nerve terminals, H455
- DL-Homocysteic acid, cardiorespiratory effects, caudal ventrolateral medulla, H688
- Hyaluronan, interstitial, lymphatic elimination in sepsis (sheep), H1524
- Hydralazine, volume load and hypertrophy, cardiac, H876
- Hydraulic conductivity, monolayers, endothelial cells, H1675
- Hydrogen, clearance, cerebral, laser-Doppler assessment, H1247
- Hydrogen peroxide
 - depression of calcium ion pump, heart sarcolemma, H368
 - myocardial levels, erythrocytes and, H584
 - photoradiation, vascular smooth muscle, H655
 - pulmonary edema and (guinea pig), H1012
- Hydroquinone, endothelium-associated, microcirculatory vasodilation and, skeletal muscle, H720
- 6-Hydroxydopamine, sympathectomy, myocardial ischemia and, H1322
- Hydroxyl radical, acetylcholine and, dilation of cerebral arterioles, H665
- Hypercapnia, blood flow and, cerebral, H697
- Hyperemia
 - reactive
 - coronary artery, H906
 - coronary reserve in stunned myocardium, H1303
 - single diastole, awake state, H1645
- Hyperkalemia, graded, monophasic action potential recordings, H956
- Hyperoxemia, oxygen flux density, coronary capillaries, H375
- Hyperoxia, whole body autoregulation during, awake state, H1023
- Hypertension
 - artery relaxation in, potassium-induced, H707
 - chronic, rapid baroreceptor resetting and, H1228
 - coarctation, attenuated microvascular alterations, H213
 - DOCA, pressor responses to vasopressin (pig, sheep), H101
 - genetic, low-salt diet and, H446
 - microvascular rarefaction in, model (hamster), H126
 - narcolepsy, sleep-waking cycles and cataplexy, H111
 - pulmonary, monocrotaline-induced, right ventricular performance after, H1328
- renovascular
 - calcium-dependent autoregulation, H1139
 - synthetic ANP and, H1393
- reversal of, vascular capacitance and, H502
- spontaneous, subfornical organ, enalapril effects on angiotensin II receptors, H1609
- Hyperviscosity, dextran-induced, regional blood flow and hemodynamics, H898
- Hypocapnia, blood flow and, cerebral, H697
- Hypoglycemia
 - cerebral blood flow, glucose use and, newborn, H1659
 - cerebral metabolism, carbon dioxide responsiveness and, H697
- Hypotension, arousal response to, sinoaortic denervation and, newborn (lamb), H434
- Hypoxemia
 - acute, fetus at 0.6-0.7 gestation (sheep), H613
 - oxygen flux density, coronary capillaries, H375
- Hypoxia
 - β -adrenergic receptor regulation during, heart cells (chick), H275
 - alveolar, ANF release and, awake state (lamb), H990
 - atrioventricular node and, heart, adult and neonate, H1337
 - cardiac metabolism, impaired, potassium loss during, H1165
 - EDRF release and, H1595
 - hypocapnic, cervical sympathectomy and cerebral microvascular responses, H460
 - ouabain effects, myocardial function, H681
 - β -receptor-adenylate cyclase coupling during, hypoxic ventricular myocytes, neonate, H1209
 - regional blood flow during, adrenal, H94
 - reperfusion, postischemic microvascular injury, H315
 - severe, regional venous outflow, H162
 - whole body autoregulation during, awake state, H1023

I

- Idazoxan, coronary flow after, during exercise, H1148
- Impedance
 - input
 - arterial system, H1684
 - simulated arterial systems, H1087
- Indicator-diffusion technique, transport kinetics, brain, H794
- Indomethacin
 - cerebral microcirculation, laser-Doppler assessment, H1247
 - PAF-acether and, circulation, newborn (piglet), H205
- Infant: *see also* Neonate; Newborn
- arginine vasopressin, cardiovascular effects (lamb), H641
- Infarction
 - myocardial
 - attenuated response to ANP, H533
 - cell-to-cell interaction, H1266

- chronic whole-body sympathectomy effects, H1322
 myosin isoenzymes and ATPase activity after, H745
 subendocardial, left ventricle, H859
 Inosine, effects, pial arterioles, H603
 Interstitial matrix, hyaluronan, lymphatic elimination in sepsis (sheep), H1524
 Intestine, oxygenation, hemodilution effects, H171
 Iodoantipyrine, cerebrovascular transport, indicator diffusion technique, H794
 Ionophore A23187, release, aortic endothelial cells, H1030
 Iron, postischemic microvascular injury and, skeletal muscle, H1472
 Ischemia
 β -adrenergic receptor regulation during, heart cells (chick), H275
 arrhythmias induced by, heart rate and, H21
 cardiac, PAF release from, H1236
 cerebral, free radical scavengers in, H589
 coronary, capillarity and vascular resistance after, H982
 exercise-induced, cumulative deterioration of myocardial function, H1462
 muscle, sympathetic outflow to resting muscles during, H105
 myocardial
 adenosine formation, propranolol prevention of (guinea pig), H772
 cellular potassium loss and anion efflux during, H1165
 chronic whole body sympathectomy effects, H1322
 function after, neutrophil depletion effects, H341
 hemodynamic response to carotid occlusion, H672
 nonischemic thickening and, anesthesia, H1417
 α -tocopherol effects, H1192
 regional, anti-free radical agents and, H1344
 Isoproterenol
 nonuniformity, left ventricular relaxation and, H222
 β -receptor-adenylate cyclase coupling, hypoxic ventricular myocytes, neonate, H1209
- K**
- Kidney
 function, prostaglandins and renin effects, low cardiac output and, H1079
 sympathetic outflow, activation by intracerebral hypertonic sodium chloride, H411
- L**
- Lactate
 cardiac metabolism, impaired, potassium loss during, H1165
 hemoglobin effects, critical oxygen transport (lamb), H527
 Length-dependent relations, unloaded contraction, heart muscle, H1289
 Length-tension relations, vascular smooth muscle, single arterioles (hamster), H630
 Leukocytes
 chemoattractant-induced adherence, dimethylsulfoxide prevention of, H594
 coronary capillarity, vascular resistance and, H982
 margination and deformation, mesenteric venules, H1667
 microcirculation and, artificially perfused lungs, H1117
 shunting, tenuissimus muscle, H85
 Lidocaine, sarcolemmal fluidity and, cardiomyocytes, H422
 Lipids
 metabolism, ventricular function and, neonate (piglet), H9
 peroxidation, vitamin E deficiency effects, H1539
 Lipopolysaccharide, lung injury, neutrophil-induced, H751
 Lipoxins, cerebral arteriole dilation and, newborn (pig), H468
 Lung
 ANTU-injured, vascular permeability and resistance in, H1711
 artificially perfused, microcirculation in, leukocyte effects, H1117
 fluid balance, arginine vasopressin effects, infant (lamb), H641
 injury, neutrophil-induced, H751
 microvascular pressure, hematocrit effects, H766
 transvascular protein transport, γ -thrombin-induced (sheep), H1690
 vascular injury, erythrocytes and liquid filtration, H515
 Lymph, flow, measurement, thoracic duct, fetus (sheep), H16
- M**
- Magnesium, reperfusion and, ischemic heart, NMR assessment, H195
 MDP: *see* Methylene diphosphonate
 Medulla, reticular formation, coronary vasoconstrictor site in, H1218
 Mesenteric arteries
 hemostatic plug formation, trigramin inhibition of, H1038
 vitamin E deficiency effects, vascular function, H1539
 Mesenteric vein, diameter, reflex control of, H1066
 Mesenteric venules, leukocyte margination and deformation, H1667
 Methylene diphosphonate, ^{99m}Tc -labeled, bone uptake of, multiple tracer studies, H1261
 Microcirculation: *see also* Blood flow; Circulation
 adenosine role in, embryo (chick), H240
 cell-to-cell communication, arterioles (hamster), H838
 cerebral
 diabetes mellitus effects, H621
 laser-Doppler assessment, H1247, H1255
 vasodilator response to acetylcholine, arachidonate effects, H665
 coronary microvascular resistance, redistribution by dipyridamole, H383
 cutaneous, rate-sensitivity of myogenic response, wing (bat), H32
 intestinal, dimethylsulfoxide and, H594
 leukocyte effects, artificially perfused lungs, H1117
 oxygen exchange in, retractor muscle (hamster), H247
 oxygen loss, arterioles, H921
 pulmonary, hematocrit effects, H766
 raised intraocular pressure, oxygen partial pressure response to, H1627
 single arterioles, length-tension relations in (hamster), H630
 skeletal muscle
 coarctation hypertension and, H213
 endothelium-associates vasodilators and, H720
 rate-sensitivity of myogenic response, wing (bat), H32
 Microhematocrit, leukocyte margination and deformation, H1667
 Microneurography, sympathetic outflow, resting muscles, during muscle ischemia, H105
 Microspheres
 radiolabeled
 coronary microvascular resistance, H383
 fetal response to acute hypoxemia (sheep), H613
 simulated using microspheres (sheep), H302
 tracer-labeled, flow distribution during vasodilation (guinea pig), H297
 Microvascular injury, postischemic, hypoxic reperfusion, H315
 Microvasculature, postischemic coronary capillarity, vascular resistance and, H982
 Minoxidil, volume load and hypertrophy, cardiac, H876
 Mitral valve
 autoradiographic characterization, heart valve leaflets, H821
 regurgitation, left ventricular function and, H974
 Models
 arterial system, H1684
 compartmental
 blood flow estimation, myocardial rubidium kinetics, H1156
 well-mixed, brain transport kinetics, H794
 computer, low-frequency oscillations, H1573
 heart rate dependence, acetylcholine, H520
 left ventricular inotropic state, single-beat evaluation, H56
 microspheres determination, cardiac output, fetus (sheep), H302
 microvascular rarefaction, hypertension and (hamster), H126
 oxygen loss, arterioles, H921
 simulated arterial system, impedance of, H1087
 ^{99m}Tc -MDP uptake in bone, multiple tracer studies, H1261
 Windkessel, pulse-synchronized contractions, H928
 Monocrotaline, pulmonary hypertension induced by, right ventricular performance after, H1328
 Muscle
 resting, sympathetic outflow to, during ischemia, H105
 retractor, oxygen exchange in microcirculation (hamster), H247
 Muscle, heart
 action potential, tissue geometry effects, H391
 segment length or force, control (ferret, rabbit), H1726

Muscle, heart (*continued*)
 unloaded contraction, oxygen consumption of, H1289
 Z-bands, structural states, H552
 Muscle, skeletal
 diabetes mellitus, vascular sensitivity to diabetes, H1134
 leukocyte shunting in, H85
 microcirculation: *see* Microcirculation
 postischemic
 free radical defense mechanisms, H789
 microvascular injury, iron role in, H1472
 small molecule reflection coefficient, H282
 Muscle, smooth
 arterial, pH-linked coupling mechanism, H867
 short-term pressure load, saphenous vein, H47
 vascular
 alterations in contractility during pregnancy (sheep), H1282
 arterioles, length-tension relations (hamster), H630
 contractile properties after photoradiation, H655
 transmitter release, pertussis toxin effects, H455
 venous, chronic tilt effects, H1185
 Muscle cells, smooth, tail artery, calcium channels in, H1361
 Muscle fibers
 hypertrophied ventricle, sarcoplasmic reticulum function, H1006
 size, capillary tortuosity, endurance training effects, H1110
 Myeloperoxidase, defense mechanisms, postischemic skeletal muscle, H789
 Myocardial cells: *see also* Heart cells; Myocytes
 damage, technique for occlusion and perfusion, coronary artery, awake state, H1719
 Myocardium
 contractility
 awake state, H352
 vagal stimulation and, H428
 vague nerve stimulation effects (chicken), H1295
 coronary microvascular resistance, redistribution by dipyridamole, H383
 creatine kinase isoenzyme response, coronary artery occlusion, H508
 fatty acid metabolism, ventricular function and, neonate (piglet), H9
 function
 cumulative degeneration, exercise-induced ischemia, H1462
 during hypoxia, ouabain effects, H681
 functional surface area, oxygen exchange, H375
 hydrogen peroxide levels, erythrocytes and, H584
 hypoperfusion, adenosine formation, propranolol prevention of (guinea pig), H772
 infarction: *see* Infarction
 ischemia: *see* Ischemia
 mechanical and structural properties, aging effects, H1440
 membrane-related alterations, α -tocopherol effects, H1192
 necrosis, wave-front progression of, H1266

nonischemic thickening, anesthesia, H1417
 normal and hypertrophied, outward currents in, H1450
 recovery from acidosis, sodium-hydrogen exchange, H256
 rubidium kinetics, model for blood flow estimation, H1156
 stunned
 ATP precursor effects, H560
 preservation of coronary flow reserve in, H1303
 ventricular
 excitation-contraction coupling, sarcoplasmic reticulum participation in (frog), H1432
 photorelease of calcium ions (frog), H916
 Myocytes: *see also* Heart cells; Myocardial cells
 cardiac
 stiffness and shortening changes, H539
 X-ray microanalysis, H574
 ventricular
 hypoxic, β -receptor-adenylate cyclase coupling during hypoxia, H1209
 normal and hypertrophied, outward currents in, H1450
 Myosin isoenzymes, ATPase and, after infarction, H745

N

α -Naphthylthiourea, injury, lung, vascular permeability in, H1711
 Narcolepsy, sleep-waking cycles and cataplexy in, cardiovascular variables during, H111
 Natriuresis
 ANP infusion, heart failure, H533
 volume expansion and ANF, H852
 Neonate: *see also* Infant; Newborn
 hypoxia effects, atrioventricular node, H1337
 sarcolemmal sodium-calcium exchange, ischemia effects, heart, H1615
 ventricular function, fatty acid metabolism and (piglet), H9
 Neural antagonists, pulmonary vascular response to, pentobarbital modification of, H1384
 Neurohumoral changes, ANP role in, heart failure (ewe), H1052
 Neurohumoral factors, prostaglandins and, low cardiac output, H1079
 Neuromodulators, cardiac output and blood flow, awake state, H1651
 Neurons, thoracolumbar spinal, responses to renal artery occlusion, H1515
 Neutrophils
 depletion, myocardial function after ischemia and, H341
 infiltration, postischemic skeletal muscle, H789
 Mol-deficient, lung injury induced by, H751
 Newborn: *see also* Infant; Neonate
 cerebral arteriole dilation, lipoxin effects (pig), H468
 hypoglycemia, cerebral blood flow and glucose use during, H1659
 PAF-acether effects, circulation (piglet), H205

response to hypotension, sinoaortic denervation effects (lamb), H434
 Nitric oxide
 EDRF release and, coronary artery, H828
 release, aortic endothelial cells, H1030
 Nitroglycerin
 endothelium-dependent dilatation of cerebral arterioles, diabetes mellitus effects, H621
 vasomotor activity, coronary collateral circulation, H890
 NMR: *see* Nuclear magnetic resonance
 Nodulus-uvula pressor response, cerebellar, H1601
 Nonuniformity, left ventricular relaxation and, H222
 Norepinephrine
 acetylcholine effects and, sodium activity in Purkinje fibers (sheep), H1407
 acute hypoxemia, fetal response (sheep), H613
 control, intrarenal arteries, H607
 neurohumoral changes, onset and offset of heart failure (ewe), H1052
 pertussis toxin and, perivascular nerve terminals, H455
 stenotic amplification, vasoconstriction responses, H1044
 sympathectomy, myocardial ischemia and, H1322
 transient calcium current and, atrium, H1500
 vascular sensitivity to, diabetes mellitus, H1134
 vasoconstriction and endothelial damage, stenotic arteries, H881
 vasomotor responses and, arterioles (hamster), H832
 Nuclear magnetic resonance
 brain pH responses, sodium bicarbonate and Carbicarb during systemic acidosis, H1316
 phosphate-31, magnesium and reperfusion of ischemic heart, H195
 phosphorus-31, ATP precursor effects, postischemic heart, H560
 Nucleoside, concentration, myocardial (guinea pig), H772
 Nucleotides, adenine, catabolism in coronary circulation, H1565

O

Obesity, uneven blunting in, chronotropic baroreflexes, H417
 Opioids, endogenous, effect on cardiac output and blood flow, awake state, H1651
 Oscillations, low-frequency, arterial pressure and heart rate, models, H1573
 Ouabain
 effects on myocardial function, during hypoxia, H681
 excitation-contraction coupling, sarcoplasmic reticulum participation in, ventricle (frog), H1432
 Oxidants, myocardial, erythrocytes and, H584
 Oxidative capacity, muscle, endurance training effects, H1110
 Oxygen
 consumption
 basal, heart, H846
 cerebral, hypoglycemia effects, H697

- fatty acid metabolism and, myocardial, neonate (piglet), H9
 gastric optimal hematocrit, H472
 hemodilution effects, H171
 minor preload dependence, heart, H1289
 myocardial, right coronary flow reserve, H1176
 phosphate metabolite relations, heart, H265
 exchange
 functional surface area for, myocardium, H375
 microcirculation, retractor muscle (hamster), H247
 loss, rate, from arterioles, H921
 partial pressure
 EDRF release and, H1595
 intraretinal and preretinal, response to intraocular pressure, H1627
 supply-to-consumption ratio, myocardium (guinea pig), H772
 tension, intraocular, sensor measurement, diabetes and, H1127
 transplacental diffusion, umbilical blood flow effects (sheep), H813
 transport, hemoglobin concentration effects (lamb), H527
 uptake, α_1 -adrenergic control, heart, H334
 Oxygenation
 gastric, optimal hematocrit for, H472
 gastric and intestinal, hemodilution effects, H171
 Oxygen metabolites
 defense mechanisms, postischemic skeletal muscle, H789
 reactive, reperfusion-induced injury, skeletal muscle, H1472
 Oxygen radicals
 leukocyte adherence and, chemoattractant-induced, H594
 myocardial, erythrocytes and, H584
 polyethylene glycol-conjugated, ischemic brain injury and, H589
 protein kinase inhibitor, pulmonary edema and (guinea pig), H1012
 reperfusion-induced injury, skeletal muscle, H1472
 Oxytocin
 central, cardiovascular responses to stress, H1369
 vascular responsiveness, adrenal insufficiency effects, H1274

P

- Pacing
 arrhythmias, ischemia-induced and reperfusion-induced, H21
 ventricular, ANP role in, heart failure (ewe), H1052
 PAF: see Platelet-activating factor
 Papillary muscle: see Muscle, heart
 Parasympathetic nervous system, vagus nerve stimulation, heart rate and ventricular contractility (chicken), H1295
 Paraventricular nucleus, acute stress effects, central oxytocin system mediation of, H1369
 Pentobarbital, modification, pulmonary vascular response to neural antagonists, H1384
 Peptides
 central nervous system, cardiovascular responses to stress and, H1369
 vasoactive, hindquarter vascular bed, H598
 Perivascular nerve, transmitter release from, pertussis toxin effects, H455
 Permeability
 bone, ^{99m}Tc -MDP, tracer studies, H1261
 capillary, small molecule reflection coefficient, H282
 endothelial monolayers, hydraulic conductivity, H1675
 microvascular, hypoxic reperfusion, post-ischemic injury, H315
 oxygen, tissue, H921
 vascular
 ANTU-injured lungs, H1711
 iron and, skeletal muscle, H1472
 lung, γ -thrombin and (sheep), H1690
 Pertussis toxin, transmitter release and, perivascular nerve terminals, H455
 pH
 brain, sodium bicarbonate and Carbicarb during systemic acidosis, H1316
 intracellular, myocardial respiration and, H265
 Phenoxybenzamine, central pressor effects, blood pressure, awake state, H1747
 Phenylisopropyladenosine
 downregulation and desensitization, heart (chicken), H321
 SA nodal bradycardia induced by, receptor mediation of, H1553
 Phosphate metabolites, relation to oxygen consumption, heart, H265
 Photoradiation, contractile properties after, vascular smooth muscle, H655
 Physostigmine, parasympathetic denervation, infarction, left ventricle, H859
 Pial arterioles, blood flow, laser-Doppler assessment, H1247, H1255
 Plasminogen, tissue-type activator, epinephrine and, hindlegs, H404
 Platelet-activating factor
 -acether, circulatory effects, newborn (piglet), H205
 release, ischemic-reperfused heart, H1236
 Polycythemia, optimal hematocrit, gastric, H472
 Posture, chronic tilt, saphenous vein and, H1185
 Potassium
 depolarized arrest, basal metabolism, heart, H846
 hyperkalemia, monophasic action potential recordings, H956
 loss, cellular, myocardial ischemia, H1165
 relaxation of arteries induced by, hypertension, H707
 Potassium current
 normal and hypertrophied ventricular myocytes, H1450
 transient, atrium, norepinephrine effects, H1500
 Potentials
 action
 cardiac, tissue geometry effects, H391
 monophasic, graded hyperkalemia, H956
 evoked, cerebral blood flow and, during Cushing response (sheep), H779
 excitatory junction, transmitter release, pertussis toxin effects, H455
 membrane, short-term pressure load, saphenous vein, H47
 transmembrane, acetylcholine effects, cardiac Purkinje fibers (sheep), H1407
 Prazosin
 acetylcholine and epinephrine interactions, repetitive activity in atrial fibers, H74
 coronary flow after, during exercise, H1148
 Preeclampsia, vitamin E deficiency effects, vascular function, H1539
 Pregnancy: see also Fetus
 alterations in contractility during, vascular smooth muscle (sheep), H1282
 cardiac output during, factors influencing changes, H1060
 Pressoregulatory mechanism, after bleeding, H291
 Pressor responses, vasopressin, with DOCA hypertension (pig, sheep), H101
 Pressure: see also Blood pressure
 arterial
 adrenal insufficiency effects, H1274
 cardiac output and, awake state and AV block, H361
 central neural control of, H688
 during hypoxia and hyperoxia, awake state, H1023
 heart rate and, low-frequency oscillations in, models, H1573
 prostaglandin effects on baroreflexes, awake state, H999
 stress, CNS peptides and, H1369
 atrial, volume expansion and, awake state, H713
 chronic overload, muscle fibers, hypertrophied ventricle, H1006
 dermal imbibition, acute burn edema, H940
 end-diastolic, left ventricular, arterial vasodilators and, H876
 flow-venous, relations, coronary artery, H906
 interstitial, erythrocytes and, injured lungs, H515
 intracranial, during Cushing response (sheep), H779
 intraocular, oxygen partial pressure response to, H1627
 isogravimetric capillary, ANTU-injured lungs, H1711
 left ventricular, nonuniformity and, H222
 mean circulatory filling, hypertension, H502
 mesenteric vein, reflex control of, H1066
 microvascular
 hematocrit effects, lung, H766
 rate-sensitivity of myogenic response, wing (bat), H32
 redistribution by dipyrindamole and, H383
 oxygen, EDRF release and, H1595
 perfusion
 hydrodynamic force effects, H1532
 persistent right coronary flow reserve, H1176
 pericardial, atriopeptin release and, H648

Pressure (*continued*)

- pulmonary artery, PAF-acether effects, newborn (piglet), H205
- pulsatile, phasic baroreceptor discharge and, H1735
- short-term load, saphenous vein, H47
- systolic, right ventricular, after pulmonary hypertension, H1328
- ventricular, isovolumic decay, vagal stimulation and, H428
- Pressure-diameter relations, aortic, diltiazem effects, H1580
- Pressure-flow relations, coronary collaterals and, H441

Propranolol

- acetylcholine and epinephrine interactions, repetitive activity in atrial fibers, H74
- acetylcholine effects and, sodium activity in Purkinje fibers (sheep), H1407
- adenosine formation and, myocardial hypoperfusion (guinea pig), H772
- dopamine-stimulated cAMP production and, renal arterioles, H626

Prostacyclin

- cerebrovascular responses and, during seizures (piglet), H120
- coronary production of, hydrodynamic force effects, H1532
- postschismic response to, diabetes effects, H1353

Prostaglandin E₂

- arachidonate and, arterial baroreflexes, awake state, H999
- cerebrovascular responses and, during seizures (piglet), H120

Prostaglandins

- endothelium-associated, microcirculatory vasodilation and, skeletal muscle, H720
- heart failure, endothelium-dependent responses in femoral artery, H962
- lipoxins and, cerebral circulation, newborn (pig), H468
- neurohumoral factors and, low cardiac output, H1079
- postschismic response to, diabetes effects, H1353
- pulmonary edema and (guinea pig), H1012

- Prostanoids, cerebrovascular responses and, during seizures (piglet), H120

Protein

- concentration, filtration coefficient in hindlimb, H186
- guanine nucleotide regulatory, hypoxia, heart cells (chick), H275
- transvascular transport, lung, γ -thrombin-induced (sheep), H1690

- Protein kinase, inhibitor, pulmonary edema and (guinea pig), H1012

- Pulmonary artery, adenosine receptors in, H41

- Pulmonary edema: *see* Edema

- Pulse wave, propagation, arterial system, H1684

- Pump, sodium-potassium, recovery from acidosis, myocardium, H256

- Purines, coronary production of, hydrodynamic force effects, H1532

Purkinje cells

- α -adrenergic outflow, GABA-mediated inhibition of, H1601
- L- and T-type calcium currents, characteristics, H1478

- Purkinje fibers, intracellular activity, acetylcholine effects (sheep), H1407

R

Rarefaction

- microvascular, role in hypertension, model (hamster), H126
- skeletal muscle, coarctation hypertension and, H213

Receptors

- adenosine
 - cardiac, downregulation of (chicken), H321
 - pulmonary arteries, H41
- adrenergic, adrenal medullary vasculature and, H233
- β -adrenergic
 - adenylate cyclase coupling, hypoxic ventricular myocytes, neonate, H1209
 - heart valve leaflets, H821
 - regulation during hypoxia, heart cells (chick), H275
- α_1 -adrenergic
 - cardiac cell mediated by, norepinephrine effects, H1500
 - coronary flow in heart and, H334
- ANP, subtype switching, vascular cells, H311
- baroreceptors
 - aberrant mechanotransduction, low-salt diet and, H446
 - age-related impairment, female, H1399
 - AV block, awake state, H361
 - phasic discharge, enhancement of baroreflex, H1735
 - rapid resetting, chronic hypertension effects, H1228
- chemoreceptors, renal, responses to renal artery occlusion, H1515
- mediation, adenosine-induced SA nodal bradycardia, H1553
- muscarinic autoreceptors, acetylcholine release and, heart, H1073

- Red blood cells: *see* Erythrocytes

- Reflection coefficient, small molecule, measurement, hindlimbs, H282

Reflexes

- baroreflexes
 - adrenal insufficiency effects, H1274
 - age-related impairment, female, H1399
 - arginine vasopressin and, infant (lamb), H641
 - arterial, prostaglandins and, awake state, H999
 - cardiac, modulation by corticotropin-releasing factor, H949
 - chronotropic, uneven blunting in obesity, H417
 - myocardial ischemia effects, H672
 - phasic baroreceptor discharge and, H1735
 - pressoregulatory mechanisms after bleeding, H291
- Bezold-Jarisch, vasopressin effects, awake state (baboon), H1546
- chemoreflexes, viscerocardiac, coronary vascular responses, H735
- control of diameter and pressure, mesenteric vein, H1066
- neurohumoral, endothelin effects, awake state, H1742

- renal, renal artery occlusion and, H1515

Renal artery

- adrenergic control, H607
- occlusion, thoracolumbar spinal neuron responses to, H1515
- vascular responsiveness, pregnancy and (sheep), H1282

Renin

- plasma activity, ANP infusion effects, renal hypertension, H1393
- prostaglandins and, low cardiac output, H1079

- Renin-angiotensin-aldosterone axis, sodium intake and, rate of activation, H1311

Renin-angiotensin system

- angiotensin II receptors and, subfornical organ in spontaneous hypertension, H1609

- arterial blood pressure maintenance and, dehydration (baboon), H486

- neurohumoral changes, onset and offset of heart failure (ewe), H1052

- pressoregulatory mechanisms, after bleeding, H291

- salt deprivation effects, blood pressure, H1426

- sodium intake and, rate of activation, H1311

Resistance

- arteriolar, vasomotor responses (hamster), H832

- coronary microvascular, redistribution by dipyrindamole and, H383

- coronary vascular, exercise effects, H1148

peripheral

- AV block, awake state, H361
- during hypoxia and hyperoxia, awake state, H1023

pulmonary vascular

- ANTU-injured lungs, H1711
- arginine vasopressin and, infant (lamb), H641
- hematocrit effects, H766
- PAF-acether effects, newborn (piglet), H205

vascular

- cerebral blood flow, laser-Doppler flowmetry, H1255

- coronary capillarity and, leukocyte effects, H982

- embryo (chick), H240

- hypoxic reperfusion, postschismic injury, H315

- norepinephrine, diabetes mellitus, H1134

Respiration

- breathing movements, thoracic duct lymph flow (sheep), H16

- DL-homocysteic acid effects, caudal ventrolateral medulla, H688

- Respiratory sinus, arrhythmia, transfer function analysis, H153

Retina

- oxygen partial pressure, response to raised intraocular pressure, H1627

- oxygen tension, fiber-optic sensor measurement of, H1127

- Rubidium, myocardial kinetics, model for blood flow estimation, H1156

Ryanodine

- caffeine relations, heart ventricles, H1100

excitation-contraction coupling, sarcoplasmic reticulum participation in, ventricle (frog), H1432

S

Salt, deprivation, blood pressure and, H1426
 SA node: *see* Sinoatrial node
 Saphenous vein
 electrical and mechanical responses, short-term pressure load, H47
 long-term tilt effects, H1185
 Saralasin, aldosterone axis, sodium intake and, H1311
 Sarcoplasmic reticulum
 cardiac myocytes, X-ray microanalysis, H574
 excitation-contraction coupling and, ventricle (frog), H1432
 function, muscle fibers, hypertrophied ventricle, H1006
 single calcium release channel, caffeine effects, H328
 Sch 23390, dopamine-stimulated cAMP production and, renal arterioles, H626
 Seizures, cerebrovascular responses during, prostanoid role in (piglet), H120
 Sepsis, *E. coli*, lymphatic elimination of hyaluronan during (sheep), H1524
 Serotonin
 endothelium-dependent dilatation of cerebral arterioles, diabetes mellitus effects, H621
 vasoconstriction and endothelial damage, stenotic arteries, H881
 Shock, leukocyte effects, microcirculation, artificially perfused lungs, H1117
 Sinoaortic nerve, denervation, arousal response to hypotension and, newborn (lamb), H434
 Sinoatrial node
 atrial response, transfer function analysis, H142
 bradycardia, adenosine-induced, receptor mediation of, H1553
 Sleep
 differential effects, coronary hemodynamic function, H1378
 REM and non-REM, narcolepsy, cardiovascular variables in, H111
 Sleep state, arousal response to hypotension, sinoaortic denervation effects (lamb), H434
 Snake venom, trigramin purified from, inhibition of hemostasis, H1038
 Sodium
 deprivation, blood pressure and, H1426
 excretion, atrial peptide effects, vasopressin potentiation of, H925
 intake, renin-angiotensin-aldosterone axis and, rate of activation, H1311
 intracellular activity, acetylcholine effects, cardiac Purkinje fibers (sheep), H1407
 Sodium bicarbonate, Carbicarb and, brain pH responses, during systemic acidosis, H1316
 Sodium-calcium exchange, sarcolemmal, ischemia effects, heart, neonate, H1615
 Sodium chloride
 intracisternal hypertonic, activation of renal sympathetic outflow, H411

intraventricular infusion, subpressor angiotensins and, synergism, H1
 Sodium-hydrogen exchange, recovery from acidosis, myocardium, H256
 Sodium-potassium-ATPase
 artery relaxation, hypertension, H707
 sarcolemmal, ischemia effects, heart, neonate, H1615
 Soleus muscle, capillary tortuosity in, endurance training effects, H1110
 Spectroscopy, near-infrared, hemoglobin saturation, noninvasive determination, H1493
 Splanchnic veins, diameter, reflex control of, H1066
 Stenotic hemodynamics, vasoconstriction responses, H1044
 Stereology, arterioles, brain stem and cerebrum, H493
 Stomach
 chemical stimulation, coronary vascular responses, H735
 oxygenation
 hemodilution effects, H171
 optimal hematocrit for, H472
 Stress
 arterial wall, during volume loading, awake state, H713
 cardiovascular responses to, central oxytocin systems and, H1369
 mechanical, short-term pressure load, saphenous vein, H47
 Strophanthidin, acetylcholine effects and, sodium activity in Purkinje fibers (sheep), H1407
 Subfornical organ, spontaneous hypertension, enalapril effects on angiotensin II receptors, H1609
 Sucrose, small molecule reflection coefficient, H282
 Superoxide, acetylcholine and, dilation of cerebral arterioles, H665
 Superoxide anion radical, depression of calcium ion pump, heart sarcolemma, H368
 Superoxide dismutase
 defense mechanisms, postischemic skeletal muscle, H789
 dose-related protection, reperfusion arrhythmias, H1344
 polyethylene glycol-conjugated, ischemic brain injury and, H589
 postischemic response to, diabetes effects, H1353
 Sympathectomy
 cervical, hypoxia and, H460
 chronic whole-body, protection of ischemic heart and, H1322
 Sympathetic activity, resting muscles, during muscle ischemia, H105
 Sympathetic nerves
 activity
 phasic baroreceptor discharge and, H1735
 severe hypoxia, H162
 sodium-angiotensin synergism, H1
 age-related baroreceptor impairment, female, H1399
 heart rate dependence, acetylcholine, model, H520
 stimulation, transfer function analysis of atrial response, H142
 Sympathetic nervous system, renal sympathetic outflow, activation by intra-

cisternal hypertonic sodium chloride, H411

T

Tenuissimus muscle, leukocyte shunting in, H85
 Tetrodotoxin
 mesenteric venous capacitance, reflex control of, H1066
 polarized arrest, basal metabolism, heart, H846
 Theophylline, acetylcholine and epinephrine interactions, repetitive activity in atrial fibers, H74
 Thermal injury, tissue pressures in, H940
 Thoracic duct, lymph flow, measurement, fetus (sheep), H16
 γ -Thrombin, nonthrombogenic, increased transvascular protein transport induced by (sheep), H1690
 Thrombosis, arterial, thromboxane antagonism (monkey), H726
 Thromboxane
 antagonism, antithrombotic activity and (monkey), H726
 cerebrovascular responses and, during seizures (piglet), H120
 endothelium-dependent dilatation of cerebral arterioles, diabetes mellitus effects, H621
 PAF-acether and, circulation, newborn (piglet), H205
 pulmonary edema and (guinea pig), H1012
 α -Tocopherol, myocardial ischemic injury and, H1192
 Transmural nerve, stimulation, adrenergic control of intrarenal arteries, H607
 Trigramin, inhibition, platelet hemostatic plug formation, H1038
 Triphenyl tetrazolium chloride technique, collateral blood flow change, after coronary occlusion, awake state, H478
 t tube, asymmetric, arterial system simulated by, impedance, H1087
 Tumor necrosis factor, anti-EDRF effect of, carotid arteries, H1509

U

U 46619, mesenteric vasoconstriction induced by, thromboxane antagonism (monkey), H726
 Ultrastructure, heart, Z-bands, H552
 Umbilical cord, blood flow: *see* Blood flow
 Urokinase, tissue-type activator, epinephrine and, hindlegs, H404
 Uterine artery, vascular responsiveness, pregnancy and (sheep), H1282
 Uterus, blood flow: *see* Blood flow

V

Vagus nerve
 cardiac activity, CRF modulation of, H949
 heart rate
 acetylcholine, model, H520
 ventricular contractility and (chicken), H1295
 muscarinic autoreceptors, acetylcholine release and, heart, H1073
 stimulation
 left ventricular relaxation and, H428

- Vagus nerve (*continued*)
 subendocardial infarction, left ventricle, H859
 transfer function analysis of atrial response, H142
- Vascular bed, hindquarter, regional response to endothelin, H598
- Vascular cells, subtype switching, ANP receptors, H311
- Vascular function, vitamin E effects, H1539
- Vascular sensitivity, norepinephrine, diabetes mellitus, H1134
- Vascular tone, resting and agonist-induced, intracellular alkalinization, H867
- Vasoactive mechanism, myogenic, single diastole, awake state, H1645
- Vasoactive substances, tissue-type activator, epinephrine and, hindlegs, H404
- Vasoconstriction
 α -adrenergic coronary, abdominal visceral organs, H735
 coronary
 collateral circulation, H890
 exercise effects, H1148
 medullary reticular formation, H1218
 endothelial damage and, stenotic arteries, H881
 mesenteric, thromboxane antagonism (monkey), H726
 propagated, arterioles (hamster), H832, H838
 pulmonary, ANF release and, awake state (lamb), H990
 responses, stenotic amplification of, H1044
 single arterioles, length-tension relations in (hamster), H630
 skeletal muscle, coarctation hypertension and, H213
- Vasodilation
 adenosine-induced, pial arterioles, inosine effects, H603
 adenosine receptors, pulmonary arteries, H41
 peripheral, vasopressin analogue effects, H1621
- perfusate flow during, heart (guinea pig), H297
 propagated, arterioles (hamster), H832, H838
- Vasodilators
 arterial, volume load and, H876
 endothelium-associated, microcirculation and, skeletal muscle, H720
 regional response to, hindquarter vascular bed, H598
- Vasomotor responses
 cell-to-cell communication, arterioles (hamster), H838
 propagation of, arterioles (hamster), H832
- Vasopressin: *see also* Antidiuretic hormone
 acute hypoxemia, fetal response (sheep), H613
 atrial peptides and, H925
 blood pressure regulation and, dehydration (baboon), H486
 cardiovascular effects, infant (lamb), H641
 cardiovascular reflexes and, awake state (baboon), H1546
 neurohumoral changes, onset and offset of heart failure (ewe), H1052
 pressoregulatory mechanisms, after bleeding, H291
 pressor responses to, with DOCA hypertension (pig, sheep), H101
 vascular responsiveness, adrenal insufficiency effects, H1274
 vasomotor activity, coronary collateral circulation, H890
- Vasopressin analogue, peripheral vasodilation induced by, H1621
- Vasospasm, arterial, stenotic amplification of, H1044
- Vena cava, occlusion, diastolic interaction gain, H567
- Venous capacity, saphenous vein, chronic tilt effects, H1185
- Venous outflow, regional, severe hypoxia, H162
- Ventilation, hypoxia, regional adrenal blood flow during, H94
- Ventrolateral medulla, lesions, fastigial cardiovascular response and, H1200
- Visceral organs, abdomen, chemical stimulation, coronary vascular responses, H735
- Vitamin E
 deficiency, vascular function and, H1539
 myocardial ischemic injury and, H1192
- Voltage clamp, X-ray microanalysis, cardiac myocytes, H574
- Volume: *see also* Blood volume
 end-diastolic, oxygen consumption and, heart, H1289
 expansion
 ANF and, H852
 atrioventricular release, pericardial pressure effects, H648
 during hypoxia and hyperoxia, awake state, H1023
 load
 arterial vasodilators and, H876
 arterial wall stress during, awake state, H713
 electrophysiological effect, heart, H1697
 overload hypertrophy, left ventricular function in, H974
 vascular, filtration coefficient in hindlimb, H186
 von Willebrand factor, endothelial cell, cryosupernatant and, H1635
- W**
- Water
 deprivation, vasopressin regulation of blood pressure (baboon), H486
 interstitial flux, lymphatic elimination in sepsis (sheep), H1524
 pulmonary edema in response to, protein kinase inhibitor effects (guinea pig), H1012
- Weight, molecular, lymphatic elimination in sepsis (sheep), H1524
- X**
- Xanthine oxidase, postischemic microvascular injury and, skeletal muscle, H1472
